

Student Health Policy

Please have an alternative plan of care for your child when s/he is ill. This will give your child the one-on-one care that s/he requires when ill and it will prevent exposure to other children. If your child has been exposed to a communicable disease, *let your child's Teacher and the School Office know as soon as possible.*

Please keep your child home from school if the following symptoms are present:

| | |
|---------------------|---|
| Appearance/Behavior | unusually tired, pale, lack of appetite, confused or irritable - atypical behavior |
| Diarrhea | two or more watery stools in a 24-hour period |
| Eyes | thick mucous or pus draining from the eye |
| Fever | temperature of 101°F or higher and/or associated with any of the above symptoms |
| Head lice | children will need to go home immediately for treatment if head lice is suspected. The hair and all clothing must be free from nits (treated or not) and lice in order to return to school. |
| Mucous | green mucous from the nose for 3 days or longer |
| Rash | unexplained body rash not associated with heat or allergic reactions, especially with fever or itching |
| Sore throat | especially if associated with fever or swollen glands |
| Vomiting | vomiting on 2 or more occasions within a 24 hour period |

For further questions regarding communicable disease or illness, please call the King County Public Health Nurse at 206.296.2770 or the Communicable Disease Control Center at 206.296.4774.
